

Mentoring – to pay or not to pay?

Mentoring is something that I am an advocate of – be it paid or voluntary. Cara Waters has produced a very interesting article on Leading Company on the topic. Well worth a read for those considering a mentor – [*'Should you pay for a mentor? The mentors who charge millions.'*](#)

It would also be great to hear from those who have had mentors in the past/present and how much value they found from the process – paid or unpaid.
